Product Information

PARP, human recombinant, expressed in E. coli

Catalog Number P0996
Storage Temperature –20 °C

Synonyms: Poly(ADP-ribose) Polymerase, PARP-1

Product Description
This product is human, recombinant PARP type 1 (PARP-1) expressed in E. coli. The protein has a molecular mass of 116 kDa and shows a major band (SDS-PAGE) at this molecular mass.

Poly(ADP-ribosylation) is a post-translational modification of nuclear proteins in response to DNA damage. This modification activates the base excision repair mechanism. At the sites of DNA strand breaks, poly(ADP-ribose) polymerase catalyzes the transfer of ADP-ribose from NAD\(^+\) to certain proteins involved in chromatin structure, DNA repair, and DNA metabolism, including PARP itself.\(^1\)\(^2\)

PARP-1 is a nuclear enzyme that synthesizes ADP-ribose polymers from NAD\(^+\), specifically binds Zn\(^{2+}\) and DNA, and recognizes single-strand breaks in DNA.\(^1\)\(^2\) It is involved in base excision repair, both short-patch and long-patch,\(^3\) rejoining DNA strand breaks,\(^1\) and plays a role in p53 expression and activation.\(^4\) A high level of basal neuronal DNA damage and PARP activity has been reported in rat brain tissue.\(^5\) PARP-1 was shown to be required for HIV-1 integration into DNA. If PARP-1 is deficient there is no productive HIV-1 infection.\(^6\)

Other members of the PARP family include PARP-2, the plant enzymes APP and NAP,\(^7\)\(^8\) and tankyrase, an enzyme originally identified and localized at human telomeres.\(^9\)

This product is supplied as a solution in 20 mM Tris-HCl, pH 8.0, 200 mM NaCl, 1 mM DTT, 0.1% Triton\(^\oplus\) X-100, 50% glycerol, and 0.1 mg/ml bovine serum albumin.

Precautions and Disclaimer
This product is for R&D use only, not for drug, household, or other uses. Please consult the Material Safety Data Sheet for information regarding hazards and safe handling practices.

Storage/Stability
The product ships on wet ice and storage at –20 °C is recommended. The enzyme retains over 65% of its activity after 24 hours at 37 °C.
