L-Histidine monohydrochloride monohydrate

Product Number H8125
Store at Room Temperature

Product Description
Molecular Formula: C₆H₈N₃O₂ • HCl • H₂O
Molecular Weight: 209.6
CAS Number: 5934-29-2
pH: 7.64¹
pKₐ: 1.80 (COOH), 9.33 (NH₂), 6.04 (imidazole group)¹
Specific Rotation: +8.9 to +10.5 (10 mg/ml, 6 M HCl, 25 °C)
Synonyms: (S) -α-amino-1H-imidazole-4-propanoic acid hydrochloride, glyoxaline-5-alanine hydrochloride, His, H

The essential amino acid L-histidine is one of the three amino acids with a basic side chain, and is very hydrophilic in character. It contains an imidazole group in the side chain. Because the pKₐ of the imidazole group is close to physiological pH, the imidazole moiety can be either uncharged or positively charged, depending on the local environment. This property makes histidine residues of exceptional interest in the active sites of many proteins, such as hemoglobin and myoglobin, where the imidazole ring can readily alternate between the charged (imidazolium) and uncharged (imidazole) states to participate in bond formation and breakage. Histidine is biosynthesized from ATP, 5-phosphoribosyl-1-pyrophosphate (PRPP), and glutamine. In turn, histidine is degraded to glutamate by histidase, urocanase, and imidazolonepropionase via the formation of urocanate, 4-imidazolone 5-propionate, and N-formiminoglutamate.³,⁴

L-Histidine has been used to study cultures of the human T-lymphoblastic leukemia cell line MOLT-4 to study modulation of apoptosis.⁵ Exogenous histidine has been shown to enhance the biosynthesis of lovastatin by cultured Aspergillus terreus.⁶ Histidine has been utilized as a single nitrogen source to probe swarming in Pseudomonas aeruginosa on agar.⁷ An in vivo study has used L-histidine to diminish the net secretory response of the small intestine of of cholera toxin-challenged mice.⁸

Precautions and Disclaimer
For Laboratory Use Only. Not for drug, household or other uses.

Preparation Instructions
This product is soluble in water (50 mg/ml), yielding a clear, colorless solution.
