

Dear valued Customer,

We have all just witnessed a period of great instability in the Acetonitrile market over the last 6 months. You will also have seen a slow improvement in the market conditions, and we are pleased to inform you that we are now holding sufficient stock to fulfill all of your Acetonitrile needs, including HPLC grades.

Although market conditions have improved, the current supply situation isn't as stable as it has been in the past. But we're optimistic to be able to provide 2008 service levels in the very near future.

For any questions or contract enquiries please feel free to contact your local Sigma-Aldrich account manager or [your local Sigma-Aldrich office](#).

Yours Sincerely
European Sigma-Aldrich Sales Team
