

# The Functional Genomics Partnership Program

## A Community of RNAi and Zinc Finger Nuclease Researchers

The Functional Genomics Partnership Program Mission – Advance research in the area of Functional Genomics by establishing partnerships with select institutions to provide researchers with priority access to cutting-edge research products and technologies.

### Features and Benefits to Membership

- Facilitation of collaborations with scientists at Sigma® Life Science and other Partnership Program members
- Invitations to local, national and international Functional Genomics Partnership Program exclusive events, meetings and seminars
- Subscription to quarterly newsletter highlighting fellow Partnership members, as well as exciting new products and applications
- Priority testing and early access to some of Sigma's new products
- Now including access to SAGE™ Labs select rat models!

### Commitment from Members

- Members are encouraged to participate in meetings and events, and establish scientific collaborations with Sigma and other Partners for ongoing research in Functional Genomics
- Members are asked to support their local Sigma representative when sponsoring technical seminars on RNAi, ZFN technologies or animal models, and encourage attendance
- Share testing data regarding Sigma products and new technologies

**Join today to take advantage of the benefits of the Partnership Program.**
