

## 40592 Atto 540Q

### Application

Atto 540Q is a new quencher for fluorescence characterized by high molecular absorption (105.000). Atto 540Q is characterized by a high photostability and thermostability. It is moderately hydrophilic, and soluble in polar solvents as DMF or DMSO.

### Product Description

$\epsilon$	105.000
Abs. max.:	542nm(H <sub>2</sub> O)
MW:	659
Quantity	1 mg

Absorbance (arbitrary units)
