## The Sigma-RBI eHandbook of Receptor Classification and Signal Transduction is now available on-line!

*Receptor classification is just a click away...  
The Updated and Expanded 4th Edition is now available on-line!*

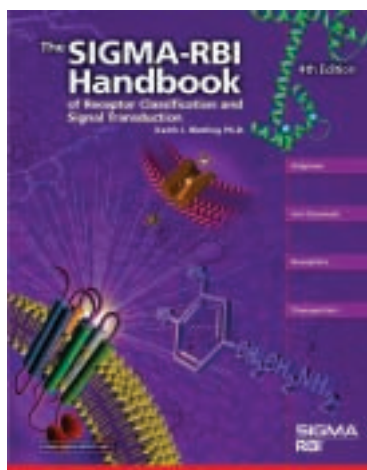

Over 150 respected research scientists have collaborated with Sigma-RBI to make the latest edition of **The Sigma-RBI Handbook of Receptor Classification and Signal Transduction** one of the best resources for information on receptors and enzymes involved in cell signaling mechanisms. Over 90 separate entries detail the most current information on a range of receptors, ion channels, transporters, and key cell signaling enzymes.

*"It is gratifying to have so much useful and informative material on receptors and signal transduction concentrated in one highly readable, easily accessible source."  
Journal of Medicinal Chemistry Book Reviews, 45, 992-993 (2002).*

A peer-reviewed overview is provided for each entry together with a list of 12 key references and a chart summarizing the classification of the subject receptors, ion channels, transporters or enzymes and detailing key ligands for their study.

Visit the **Sigma-RBI eHandbook of Receptor Classification and Signal Transduction**, on-line at [sigma-aldrich.com/sigma-rbiehandbook](http://sigma-aldrich.com/sigma-rbiehandbook)

*Also available in hard copy, see below.*

## The 4th Edition of The Sigma-RBI Handbook of Receptor Classification and Signal Transduction

The Sigma-RBI Handbook of Receptor Classification and Signal Transduction (formerly the RBI Handbook) is one of the most respected and widely-used reference books on receptor action and cell signaling.

*K.J. Watling, Ed., Sigma-RBI, 2001,  
240 pp. Soft Cover, ISBN: 0964054833  
Product Code [S 8188](#)*

To order your own copy, call 800-325-3010 (U.S.), fax 800-325-5052 (U.S.) or contact your local Sigma-Aldrich office.
