IgG from porcine serum
reagent grade

Catalog Number I4381

Product Description
Purified pig IgG is isolated from pooled normal pig serum by fractionation and ion-exchange chromatography.

Reagent
Supplied as an essentially salt-free lyophilized powder.

Precautions and Disclaimer
This product is for R&D use only, not for drug, household, or other uses. Please consult the Material Safety Data Sheet for information regarding hazards and safe handling practices.

Storage
Prior to reconstitution, store at 2-8 °C. After reconstitution, store aliquots at −20 °C. Repeated freezing and thawing is not recommended.

Reconstitution
The product is to be reconstituted to a minimum of 1 mg/ml with a 150 mM NaCl solution. Protein concentration should be determined after reconstitution by absorbance at 280nm (E₂₈₀ 1% = 14).

Uses
Purified pig IgG may be used as a reference antigen, standard, blocking agent, or coating protein in a variety of immunoassays including ELISA, dot immuno-binding, Western immunoblotting, immunodiffusion, and immunoelectrophoresis. Other applications include starting materials for the preparation of immunogens and solid-phase immunoadsorbents.

Performance Characteristics
Purity: ≥ 95% (SDS-PAGE)

Identity (Immunoelectrophoresis): Single arc of precipitation in the gamma region versus anti-porcine whole serum and anti-porcine IgG. Minor gamma arcs may be present versus anti-porcine whole serum.

Sodium (ICP): ≤1.0%
