13(S)-[9Z,11E]-HYDROPEROXY-OCTADECADIENOIC ACID
(13[S]-HPODE)

Product No. H 9271

SPECIAL HANDLING INSTRUCTIONS
All glassware and stainless steel syringe needles to be used in the transfer of 13(S)-HPODE solution should be pre-rinsed with absolute ethanol and air dried. Transfer and removal of samples should be performed in indirect light and under an inert atmosphere, keeping the bulk at 0 °C or below whenever possible.

13(S)-HPODE is unstable to oxygen and direct sunlight, therefore extreme care must be taken in handling this product.
