The life science business of Merck KGaA, Darmstadt, Germany operates as MilliporeSigma in the U.S. and Canada.
TRANSITIONING your ELISA to a lateral flow test?

See our Lateral Flow brochure for information on:
• Membranes and pads
• Dry reagent stabilizers
• Detection technologies

MilliporeSigma offers years of experience in critical and non-critical raw material manufacturing, supporting a full range of custom and contract manufacturing services for diagnostic manufacturers.

Let us partner with you from the development of the initial concept, through to scale up and final manufacturing. We ensure that you have quality products, at the optimal scale, at the right time, to aid your rapid commercialization.

Simplify ELISA assay development and manufacture with a partner who understands the IVD Market

Your Partner from Concept to Clinic
Accelerate time to market with fit-for-use products from MilliporeSigma. We offer the quality, consistency and documentation necessary for every step of your IVD development and manufacturing process.

We offer:
• Product selection assistance
• Risk mitigation support
• Clear quality and supply chain guidelines
• A reliable and transparent global supply chain
• Proactive forecasting
• Superior documentation
• Regulatory insight

Meeting your complete raw material needs for ELISA assay manufacturing

Antibody Portfolio & Custom Services
• Over 90,000 primary and secondary antibodies
• In-house development, production and purification expertise
• Custom antibody and protein production and conjugation services

Comprehensive Antibody & Protein Development & Production Reagents
• Immunization adjuvants
• Routine cell culture
• Hybridoma support reagents
• Purification resins

Blocking Agents
• Wide range of BSA, including Probumin® BSA for IVD applications
• Blocking buffers and reagents
• ChemiBlock™ – Active, passive, and isotype-specific agents
• Alternative blockers, including sera and purified immunoglobulins

Quality Ancillary Reagents
• Buffers
• Detergents and surfactants
• Protease and phosphatase inhibitors
• Proteins and peptides
• Acids, bases and salts
• Biocides
• Milli-Q® water
• Plasticware

Estapor® Magnetic & Polymeric Microspheres
• In-house manufacturer of microspheres
• Functionalized or non-functionalized surfaces
• Classic and custom coatings and conjugations

Detection Enzymes, Substrates & Coupling Reagents
• Horseradish peroxidase and alkaline phosphatase enzymes
• Colorimetric and chemiluminescent substrates
• Streptavidin and biotin

Contract Manufacturing of Finished IVD ELISA Kits
MilliporeSigma has extensive experience in contract manufacturing of IVD products, including ELISA and other immunassays, under our customers’ labels at our ISO 13485- and FDA-registered facilities.

Whether you are bringing a new product to market or looking to outsource an existing product, you can achieve seamless vertical integration with a raw material and finished goods production partner who has over 350 years of life science manufacturing experience.

• ISO 13485- and FDA-registered production sites
• Dedicated project support
• Extensive manufacturing expertise
• Functional QC run on your instruments
