

Product Information

Anti-SCYE1
antibody produced in chicken,
affinity isolated antibody

Catalog Number **GW21105**
Formerly listed as GenWay Catalog Number 15-288-21105,
Multisynthetase complex auxiliary component p43 Anti-
body.

Storage Temperature Store at -20 °C

Synonyms: Small inducible cytokine subfamily E, member 1;
endothelial monocyte-activating polypeptide

Product Description

Seems to have both an inflammatory cytokine activity and
tRNA-binding domain.

NCBI Accession number: NP_004748.1
Swiss Prot Accession number: Q12904

Gene Information: Human .. SCYE1 (9255)

Immunogen: Recombinant protein Small inducible cytokine
subfamily E, member 1; endothelial monocyte-activating
polypeptide

Immunogen Sequence: GI # 4758266, sequence 130 - 201

The product is a clear, colorless solution in phosphate
buffered saline, pH 7.2, containing 0.02% sodium azide.

Species Reactivity: Human

Tested Applications: WB

Recommended Dilutions: Recommended starting dilution
for Western blot analysis is 1:500, for tissue or cell staining
1:200.

Note: Optimal concentrations and conditions for each
application should be determined by the user.

Precautions and Disclaimer

This product is for R&D use only, not for drug, household, or
other uses. Due to the sodium azide content a material
safety data sheet (MSDS) for this product has been sent to
the attention of the safety officer of your institution. Please
consult the Material Safety Data Sheet for information
regarding hazards and safe handling practices.

Storage/Stability

For continuous use, store at 2–8 °C for up to one week. For
extended storage, store in -20 °C freezer in working
aliquots. Repeated freezing and thawing, or storage in
“frostfree” freezers, is not recommended. If slight turbidity
occurs upon prolonged storage, clarify the solution by
centrifugation before use. Working dilution samples should
be discarded if not used within 12 hours.
