

Product Information

GOAT SERUM

Product Number **G 9023**

Product Description

Goat Serum is a pooled preparation obtained from a normal donor herd.

Immunoelectrophoresis against anti-goat serum results in multiple arcs of precipitation. The presence of endogenous antibodies has not been assayed.

Normal goat serum is often used as a blocking agent or negative control in immunoassays.

Reagents

This product is provided as a liquid containing preservative.

Precautions and Disclaimer

This product is for research use only. Consult the MSDS for information regarding hazards and safe handling practices.

Storage/Stability

Store at 2-8 °C for up to one month.

For extended storage, the solution may be frozen in working aliquots. Repeated freezing and thawing is not recommended. Storage in "frost-free" freezers is not recommended.
